Brand-Rex

18th November 2009

To Gilbert Owens, Ideal Industries

Re: The Lantek II

Dear Gilbert,

Brand-Rex has received the new Lantek II device and, after evaluation, approves the product for use in certification of the installed performance of Brand-Rex 10GPLUS, Cat6Plus and GigaPlus structured cabling systems.

The Lantek II in our tests, proved reliable and consistent in measurement of both screened and unscreened cabling systems. The new Lantek II is a significant advancement in test technology.

The Lantek II is approved for characterising Brand-Rex 10GPLUS, Cat6Plus and GigaPlus products in channel, permanent link or CP link configurations against the published international standards. These standards include:

- ISO/IEC 11801:2002 and amendments
- EN 50173-1:2007 and amendments
- ANSI/EIA/TIA 568B series and addenda and 568C series as applicable.

Please update the Ideal Industries web site and documentation to acknowledge Brand-Rex's approval.

We look forward to continuing to work with Ideal Industries in the future to evaluate new generations of products as they become available.

Best regards,

K G Hodge
R&D Manager
